**Heliomolar<sup>®</sup>** Microfill Restoratives

## Heliomolar®

The Clinically Tried-and-Tested Universal Composite for Anterior and Posterior Restorations

### 20 Years of Proven Performance

The reinforced microfiller formula of Heliomolar provides excellent esthetics and polishability, high strengths, and renowned wear resistance. These features, combined with a proven performance record, have made Heliomolar the benchmark composite material by which all new materials are measured.

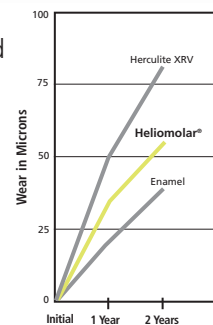

**Indicated for both anterior and posterior applications, Heliomolar provides the following features and benefits:**

- Outstanding Microfill Esthetics
- Impressively Low Wear Abrasion
- Continuous Fluoride Release
- Universal Application (Posterior & Anterior)
- Syringe and Cavifil Delivery

Heliomolar is available in 11 Esthetic Shades including a pedo shade and two enamel shades.

An independent study\* demonstrated the outstanding wear performance of Heliomolar.

This 15 year old Heliomolar restoration demonstrates the TIME TESTED success regarding function *and* esthetics. (Dentistry by Doug Lambert, DDS)

# Heliomolar® Flow

The Flowable Microfill Developed on 20 Years of Proven Performance and Success.

## The Flowable Microfill That Gets Down into the Tightest Spots.

Based on a formulation with 20 years of proven performance, Heliomolar Flow provides excellent esthetics, superior polishability and excellent flowability. Packaged in Luer-Lock syringes, each Heliomolar Flow refill includes small applicator tips (0.9mm), pre-bent at 45° to facilitate easy and precise placement.

**Indicated for all flowable applications,  
Heliomolar Flow features:**

- Outstanding Microfill Esthetics
- Impressively Low Wear Abrasion
- Excellent Flow Properties
- Continuous Fluoride Release
- Optimal Wetting
- Luer-Lock Syringe Delivery

Heliomolar Flow is available in 7 Esthetic Shades including a pedo shade and two enamel shades.

### Heliomolar® Flow

Heliomolar® Flow's unique wetting properties allow for complete penetration to the depth of the cavity prep.

### Other Flowables

Other hybrid flowables do not routinely penetrate to the base of the cavity preparation, leaving undesirable gaps and spaces.

# Heliomolar® HB

The First “Heavy Body” Reinforced Microfill

**Heliomolar HB is CLEARLY the PERFECT material for posterior restorations.**

Along with excellent esthetics and superior polishability, Heliomolar HB’s advanced “Heavy Body” handling characteristics provides the packability and sculptability necessary for posterior restorations.

**Heliomolar HB’s two NEW translucent shades**, Translucent White (TW) and Translucent Gray (TG) take esthetics to a whole new level. These virtually clear shades, combined with the exceptionally low wear rates of Heliomolar HB, make them the perfect choice for the final occlusal layer on all posterior restorations. Now, dental professionals can create posterior restorations with highly translucent esthetics and long lasting performance.

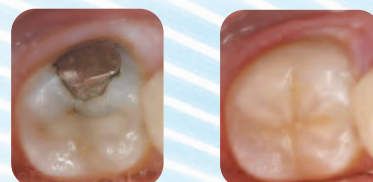

**Indicated for all posterior restorations,**

**Heliomolar HB Features:**

- “Heavy Body” Consistency
- Outstanding Microfill Esthetics
- Impressively Low Wear Abrasion
- High Levels of Translucency
- 20 Second Cure Time

Heliomolar HB is available in 11 esthetic shades.

BEFORE

AFTER

Heliomolar HB restoration using Heliomolar Flow as the initial liner, Heliomolar HB in the body of the restoration and the new translucent shades of Heliomolar HB as the final occlusal layer.

*(Denistry by Robert Ritter, DDS)*

## ✓ Time Tested.

Heliomolar<sup>®</sup>, with over 20 years of clinical success, is the material of choice for class II restorations according to a leading independent research organization.\*

## ✓ Time Proven.

Heliomolar<sup>®</sup> is the benchmark composite, offering exceptionally low wear rates similar to enamel.\*

## ✓ Time you tried it.

The Heliomolar<sup>®</sup> family of products provides dental professionals with a proven formulation in three viscosities satisfying all indications and placement techniques. Numerous independent studies have been published supporting the clinical success of Heliomolar's reinforced microfill chemistry over the past 20 years.

### The Heliomolar<sup>®</sup> Family of Products

#### 1 Proven Microfill Chemistry – 3 Viscosities

Heliomolar<sup>®</sup>Flow, Heliomolar<sup>®</sup> & Heliomolar<sup>®</sup>HB all feature:

- Outstanding Microfill Esthetics in a Variety of Shades
- Superior Polishability
- Excellent Handling Properties
- Renowned Wear Resistance
- High Radiopacity\*
- Fluoride Release
- Multiple Delivery Forms
