

A step ahead

FujiCEM™ Evolve  
from GC

Innovative resin-modified glass  
ionomer cement for  
a trustful performance and  
enjoyable convenience

**GC**

# FujiCEM Evolve from GC

## A step ahead

Glass ionomers are GC's legacy, with proven quality as seen in independent studies all over the world. Take a step ahead by choosing for easy application, less technique sensitivity and high moisture tolerance with FujiCEM Evolve.

### Hand mix or automix

- Openings are far apart: pastes do not contaminate each other, hand mixing is possible

- Easy to place  
"Push and Click" mixing tip
- Can be dispensed directly into the restoration or the root canal (with the endo tip)

### The resin-modified glass ionomer you can trust

- Less technique-sensitive than resin cements
- No need for pre-treatment: one-step application
- Long working time, short setting time
- Moisture tolerant: rubber dam is not required
- Less risk of post-operative sensitivity
- Excellent sealing and marginal adaptation

Courtesy of Dr. J. Tapia Guadix, Spain

### Optimal viscosity

- Controlled extrusion for an easier procedure
- Low film thickness & precise adaptation
- Tack-cure option for easier excess removal

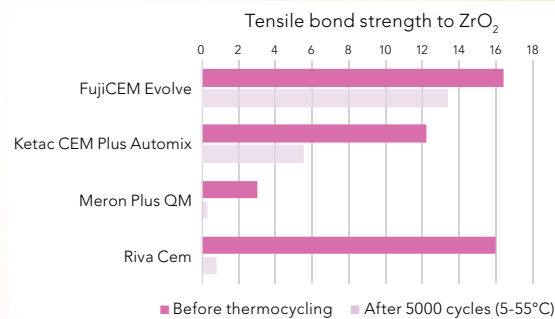

Courtesy of Dr. J. Tapia Guadix, Spain

## Reliable bonding in all circumstances

Source: GC R&D Data, Japan, 2018. Data on file.

## Optimised adhesion to zirconia

Source: GC R&D Data, Japan, 2018. Data on file.

## Long-chain monomer technology

- Super-long monomer chains for strength and stability of the cement.

- Radiopaque glass filler for excellent visibility on X-ray (> 250% Al)

## A versatile option for the everyday practice

FujiCEM Evolve is the versatile option for your everyday practice as it can be used for many indications and does not require absolute moisture isolation. Moreover, its improved bond strength to zirconia makes it particularly interesting to lute your high-strength all-ceramic restorations.

Indicated for:

# FujiCEM Evolve from GC

## A step ahead

Initial situation

Dispensing with automix

Seating of the restoration

Rubbery state is reached after just 3 s of tack-curing

Easy to remove excess at once

Final result
